

27%

of healthcare spending in the US was due to preventable illnesses

\$730.4 billion

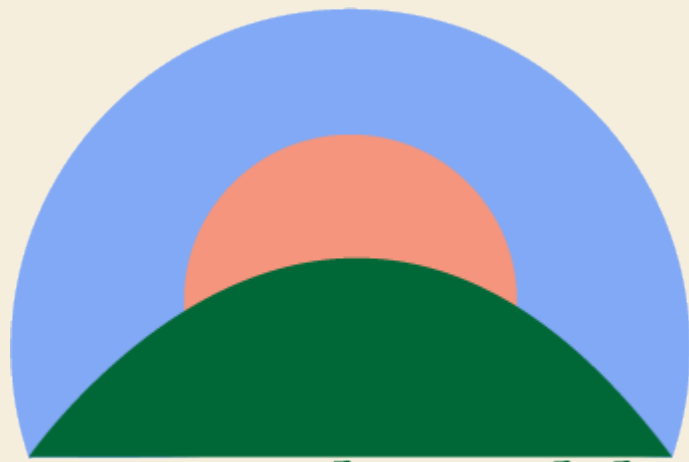

In preventable healthcare costs

How can we access this money?

What can we do to make keeping healthy profitable?

Beyond Health

Keeping people from
becoming patients

The Clinic

What makes our locations unique?

Main Competitors

CVS Minute Clinic

- Very convenient
- Easy to schedule online
- Easy to do multiple things in one session during sign up
- Uniform experience across many locations

Family/Wellness Clinics

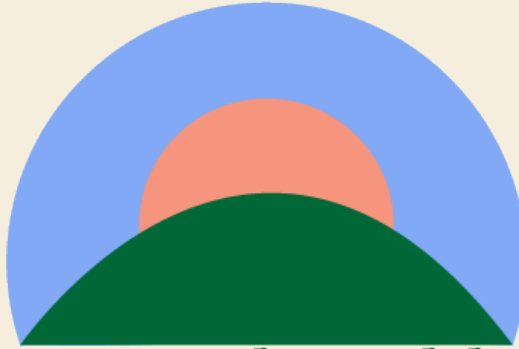

- Usually pediatricians
- For many, this is the last point of consistent contact with a medical professional they had
- Individualized experience

Beyond Health Clinics

Mobile Clinics

In addition to a small physical location, several mobile clinics will be available

Consult not Command

Adult patients want to feel some control in their care, and they want more information

Midlevels

Patients want to be seen for longer times and have a more individualized experience

Key Advantages

Scalability

Decreased operational costs make expansion easier, and the nature of mobile clinics means they can support larger areas.

Cost and Convenience

Lower costs and increased convenience mean more time per patient and increased likelihood to seek further care.

What's Next?

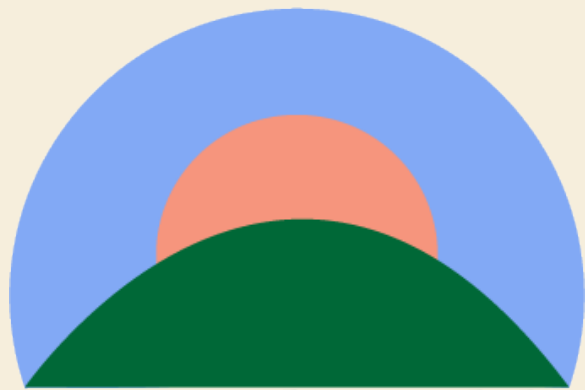

Expand services and create a pool of data proving that preventative healthcare is profitable and effective

Data Collection

Pitch preventative care to large companies that are able to self-insure, and seek to guide them through the process

Large Scale Clients

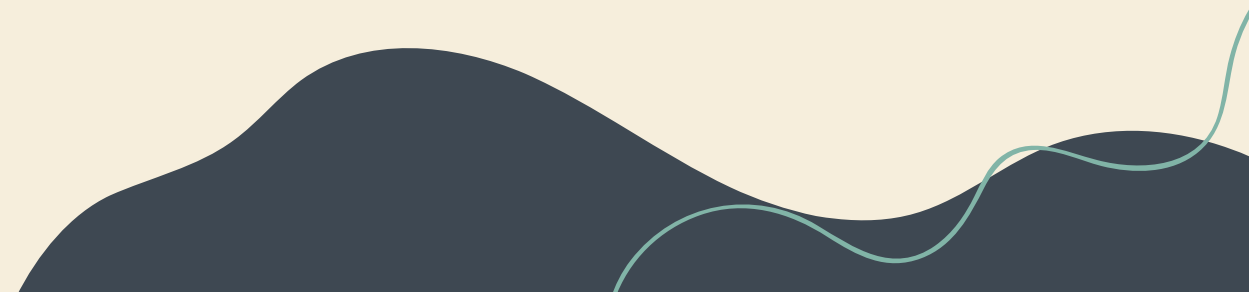

The Goal: Increase Population Health

Thank You!

Appendix

The Business Model Canvas

Key partners

What are your key partners to get competitive advantage?

Hospitals and other healthcare providers

Large-scale employers

EHR

App developer if seeking mobile leverage

U.S. Government for research grants

Pharmacies

Insurance Companies

Other Specialists

Key activities

What are the key steps to move ahead to your customers?

Look at wellness more than health

Organized efficient check ups

Use midlevels and nurses. Doctors only when needed

Key resources

What resources do you need to make your idea work?

Human Resources: PCPs, Mid Levels, Nurses

Mobile clinics

Physicians to refer to

Key propositions

How will you make your customers' life happier?

Cost savings on normal insurance plans

Increased productivity from healthier workers

Lower cost healthcare in the form of large-scale long-term contracts

Value-based care

PR bonus from having innovative and employee focused policies

Midlevels are cheaper and therefore able to see patients for longer before it becomes inefficient.

Customer relationships

How often will you interact with your customers?

Annually for regular check up on individual

Monthly/ weekly for large companies who have teams of people to get checked

Channels

How are you going to reach your customers?

Outreach

Pitching to leadership

App with subscription and helps with upkeep of healthy lifestyle habits

Customer segments

Who are your customers? Describe your target audience in a couple of words.

Large businesses that want in-house insurance

Employers who see the value in the increased productivity of preventative care

Individuals who want to stay healthy rather than get treated

Cost Structure

How much are you planning to spend on the product development and marketing for a certain period?

Consumer Marketing isn't as necessary if a contract can be made with established companies

Market towards big business, leverage cost savings on running your own insurance

Midlevels over doctors to lower prices.

Revenue Streams

How much are you planning to earn in a certain period? Compare your costs and revenues.

Primarily from large contracts with companies that want to subscribe on at the moment on without the cost of setting up their own system

Regular clinic provisions - prescriptions and orders

Cost savings

The Clinic

What makes our locations unique?

The Change

How do we grow further?

The Future

What is our end goal?
