Product advice

Catálogo 2023

Férulas

Férula estabilizadora

Férula principalmente para la estabilización de la muñeca en la posición correcta con la ventaja de diseño en malla para mayor comodidad del usuario ya que genera mayor ventilación y es ligera.

Férula en posición de reposo

Férula de inmovilización articular de la muñeca para mantenerla en una posición funcional. Es de utilidad para personas con lesiones articulares o con espasticidad.

Férula extensora

Férula con elásticos ajustables que simulan la función de los tendones, generando resistencia para una mejor rehabilitación del paciente.

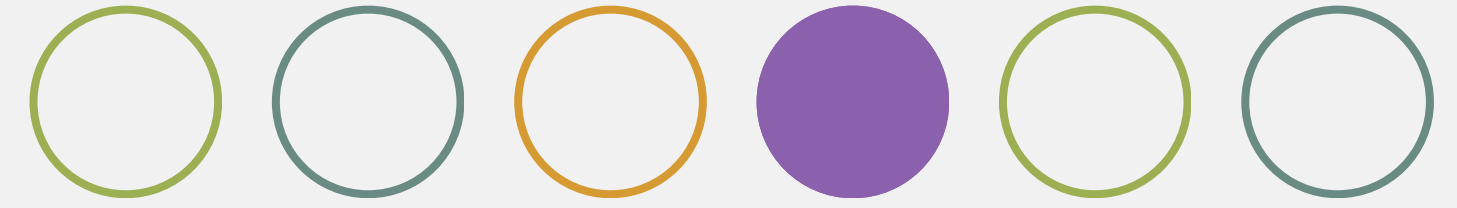

Férula de pulgar

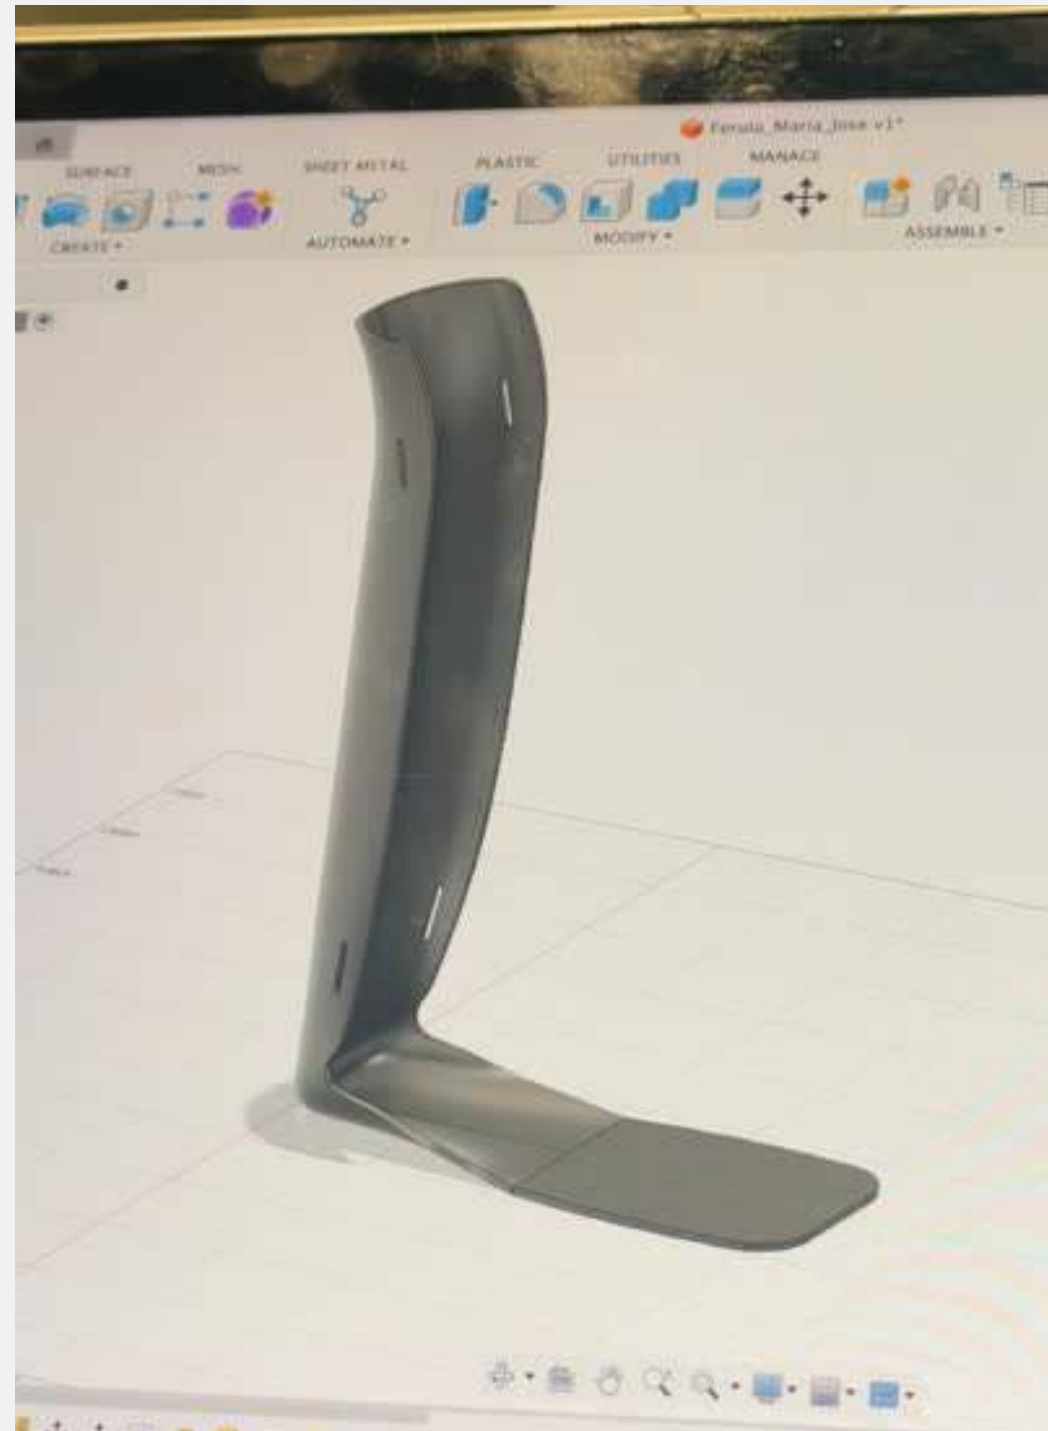

Férula para el pulgar con el objetivo de facilitar el movimiento de pinza para la corrección del pulgar en aducción.

THE BUSINESS MODEL CANVAS

KEY PARTNERS

Health and Rehabilitation Centers

- CRIT
- DIF Coahuila
- CREE
- CAM
- Hospital Universitario

Education Institutions

- Universidad de Carolina
- Bachillerato Anahuac
- Ing. Moctezuma
- COECyT

Material Suppliers

KEY ACTIVITIES

- Research, innovation, and continuous improvement
- 3D scanning, printing, and device manufacturing
- Custom design for each user
- Marketing, education, and community outreach
- Feedback gathering and follow-up with clients
- Patient evaluations
- Co-design of adapted toys (new activity with university)

KEY RESOURCES

- 3D printing and scanning equipment
- Design templates
- Specialized software for design
- Biomedical engineers and rehab experts
- University student collaborators

VALUE PROPOSITIONS

- **Personalization:** Assistive technologies tailored to the user's specific needs
- **Economic Accessibility:** Use of 3D printing to reduce costs
- **Quality of Life:** Improving independence and well-being for people with disabilities
- **Social Inclusion:** Eliminating barriers and fostering participation in work, education, and social environments
- **Innovation in Play:** Designing inclusive toys for children with disabilities

CUSTOMER RELATIONSHIPS

- **Personalized Attention:** Individualized consultations and ongoing support
- **Technical Support:** Help with device use and maintenance
- **Client Follow-Up:** WhatsApp surveys and follow-up appointments
- **Continuous Doctor Referrals**

CHANNELS

- Social media: product promotion, educational content, and inclusion tips
- Direct WhatsApp communication
- Strategic partnerships with institutions and government
- Health fairs, educational events

CUSTOMER SEGMENTS

- **People with Disabilities:** With motor, visual, or other impairments
- **Families and Caregivers:** Seeking affordable, effective solutions
- **Foundations and Organizations:** Supporting disability inclusion
- **Health Institutions:** Looking for assistive solutions for their patients
- **Children with Disabilities:** Now also supported through adapted toys

COST STRUCTURE

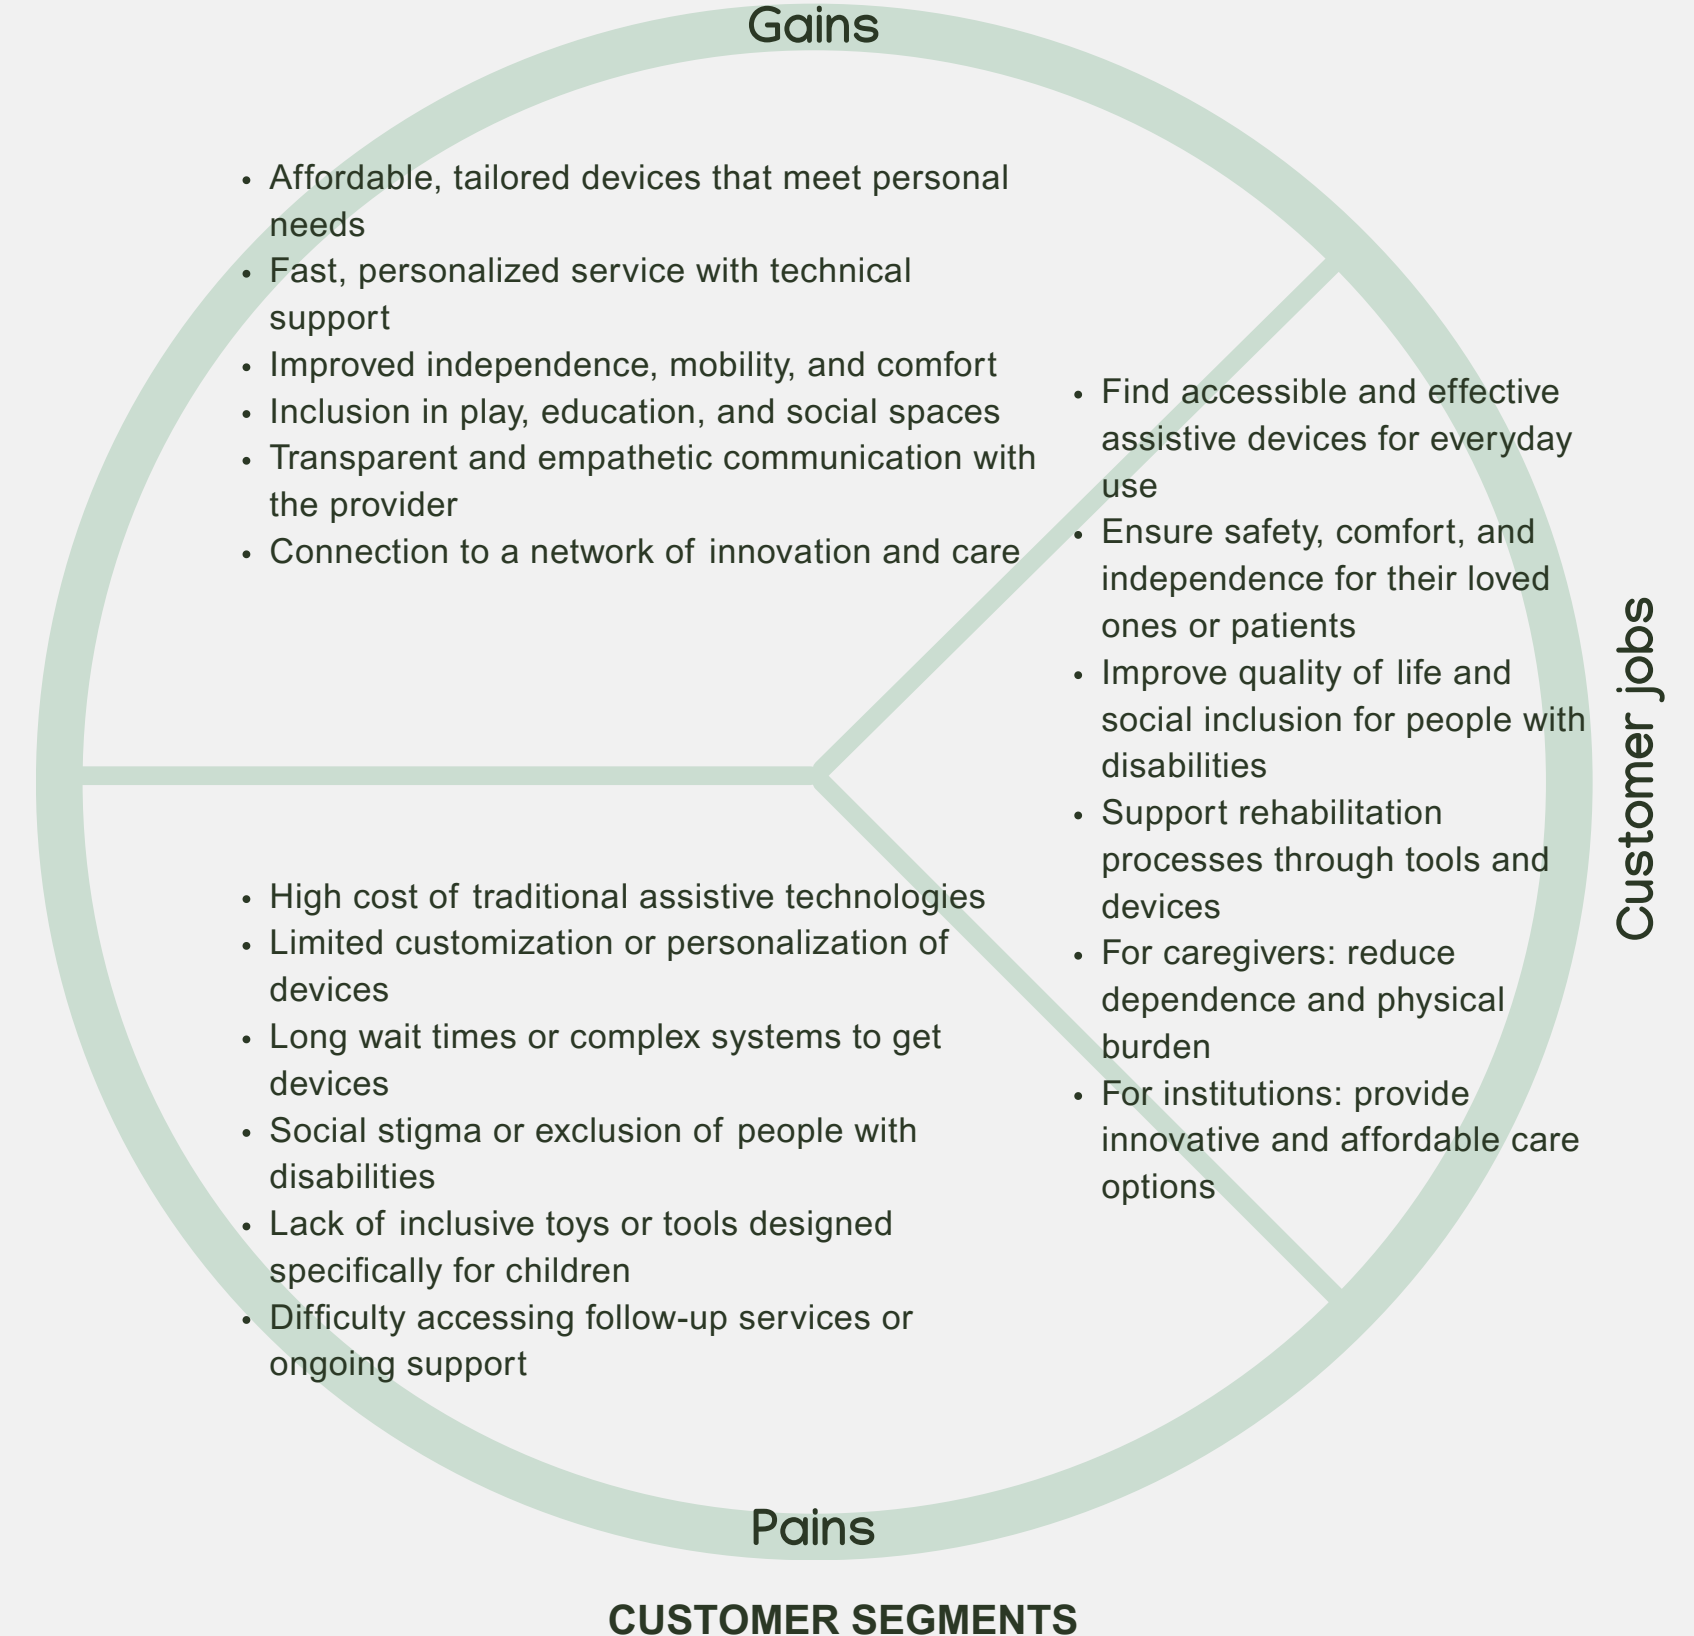

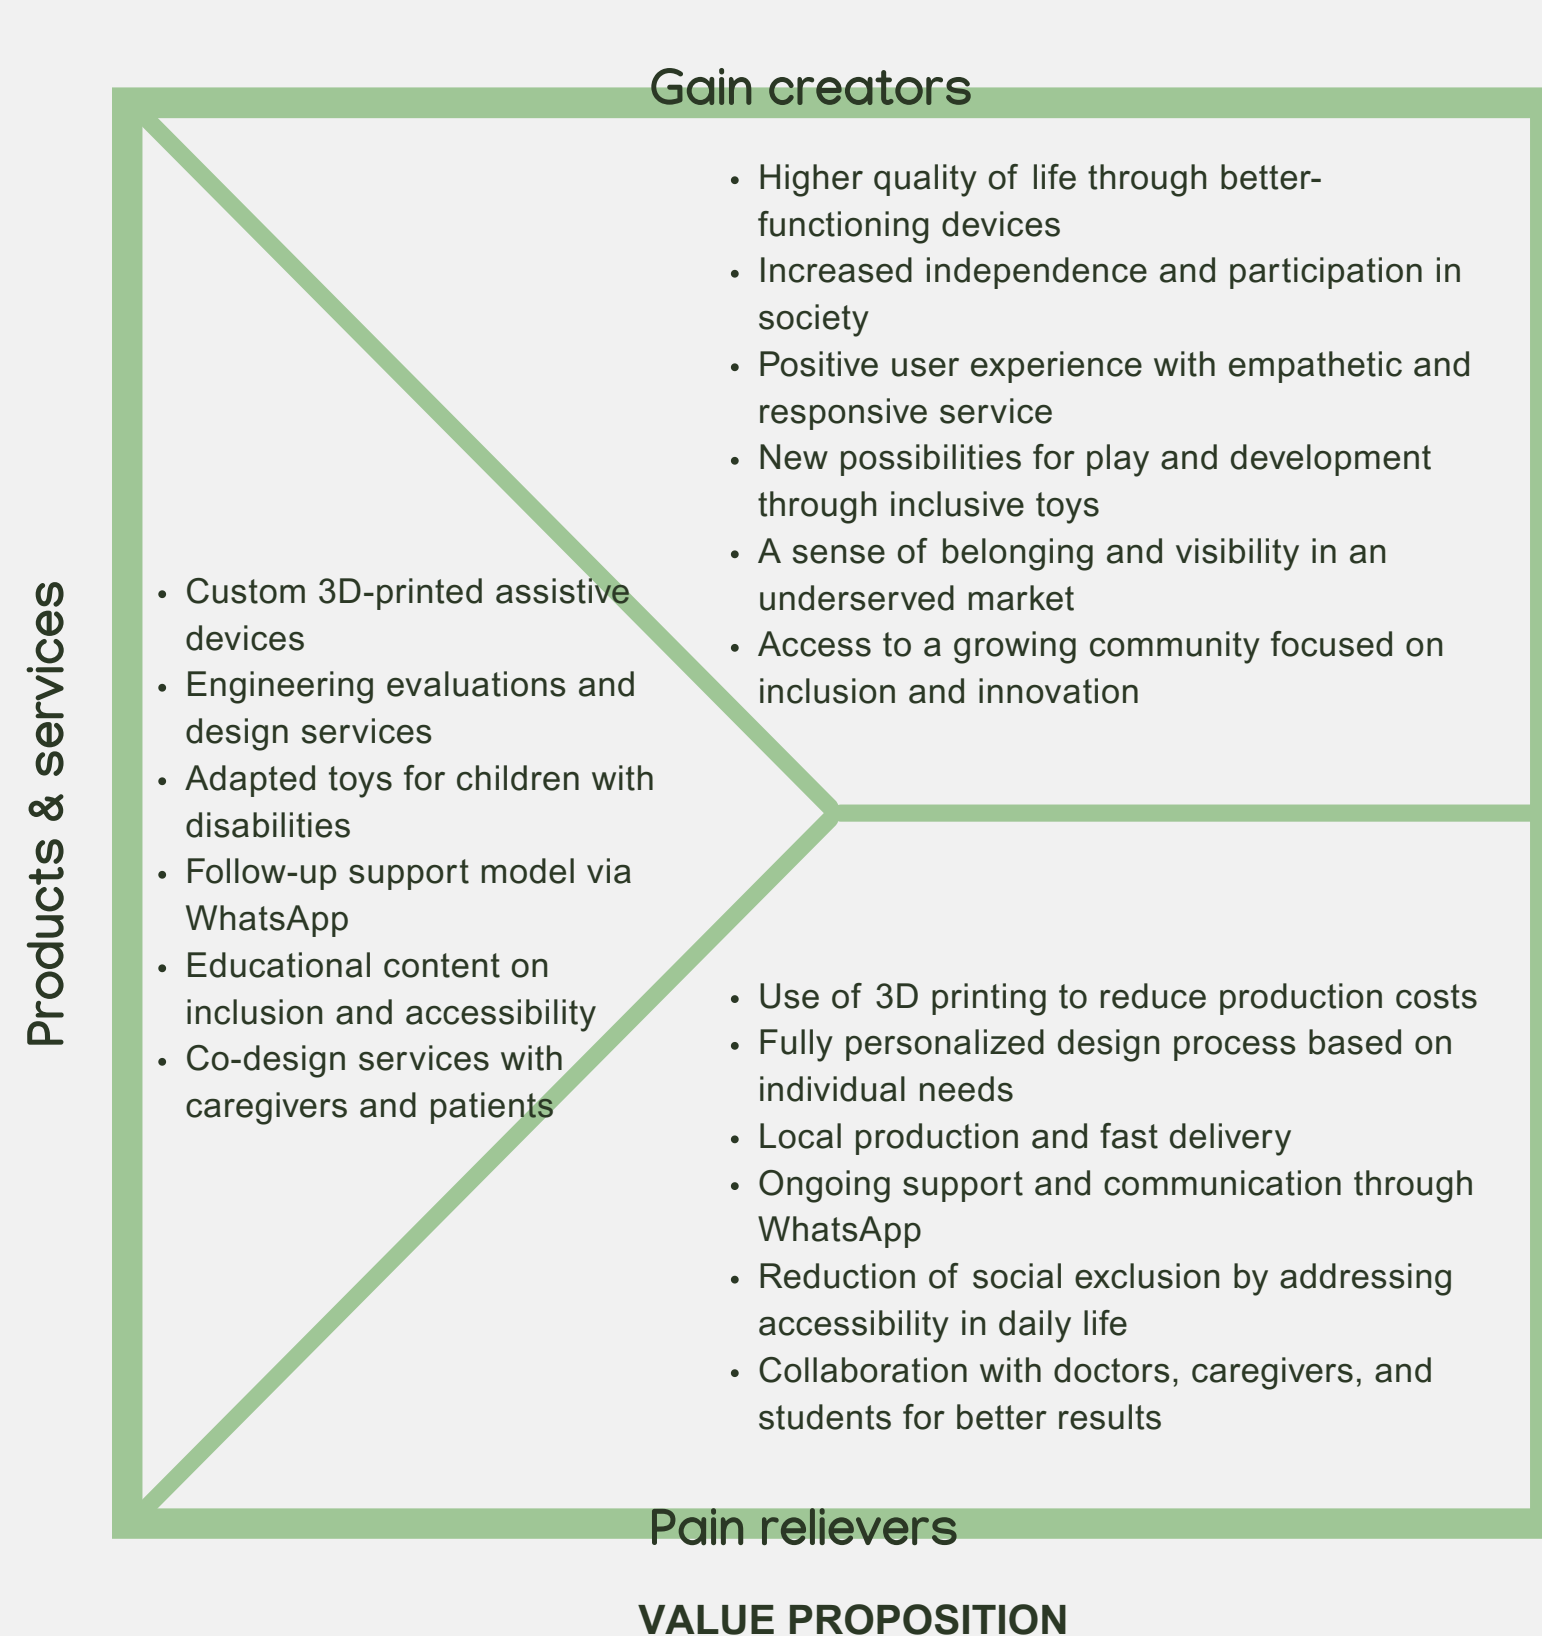

- **Production:** Equipment operation, materials
- **Customization:** Patient assessments, biomedical engineering design
- **Marketing & Distribution:** Promotion, shipping
- **Maintenance & Support:** Devices, printers, and scanners upkeep
- **Collaborations:** New design projects with students (low cost, high impact)

REVENUE STREAMS

- **Sales of Custom Products**
- **Consulting Services:** Engineering assessments and design
- **Device Maintenance / Follow-Up Services** (potential future model)
- **Grants and Donations:** Institutional and philanthropic support
- **Innovation-Driven Growth:** Design updates and new product offerings

VALUE PROPOSITION CANVAS

- People with disabilities (motor, visual, or cognitive)
- Parents and caregivers of children with disabilities
- Healthcare and rehabilitation institutions
- Foundations and organizations that support disability inclusion
