

HereHear

Business of Design, 2023

Evan Stack & Sanjana Nagaraja

**"Blindness separates people
from things; deafness separates
people from people." - Helen
Keller**

One in eight people in the United States (**13 percent, or 30 million**) aged **12 years or older** has hearing loss in **both ears**, based on standard hearing examinations.

Approximately **15% of American adults (37.5 million)** aged **18 and over** report some trouble hearing.

Among adults aged **70 and older with hearing loss who could benefit from hearing aids, fewer than one in three (30 percent)** has ever used them. Even **fewer adults aged 20 to 69 (approximately 16 percent)** who could benefit from wearing hearing aids have ever used them.

How do we make hearing health and care **more important?**

Our Value Proposition:

Hearing Health as a Standard

Our clinic aims to emphasize the importance of hearing health, setting a new standard for **education**, **prevention**, and **service** to communities that may not have access to separate hearing services

Prevention

Create a freestanding space, dedicated solely to hearing health with an emphasis on prevention.

Education

Serve as an educational resource to encourage the preservation of hearing quality

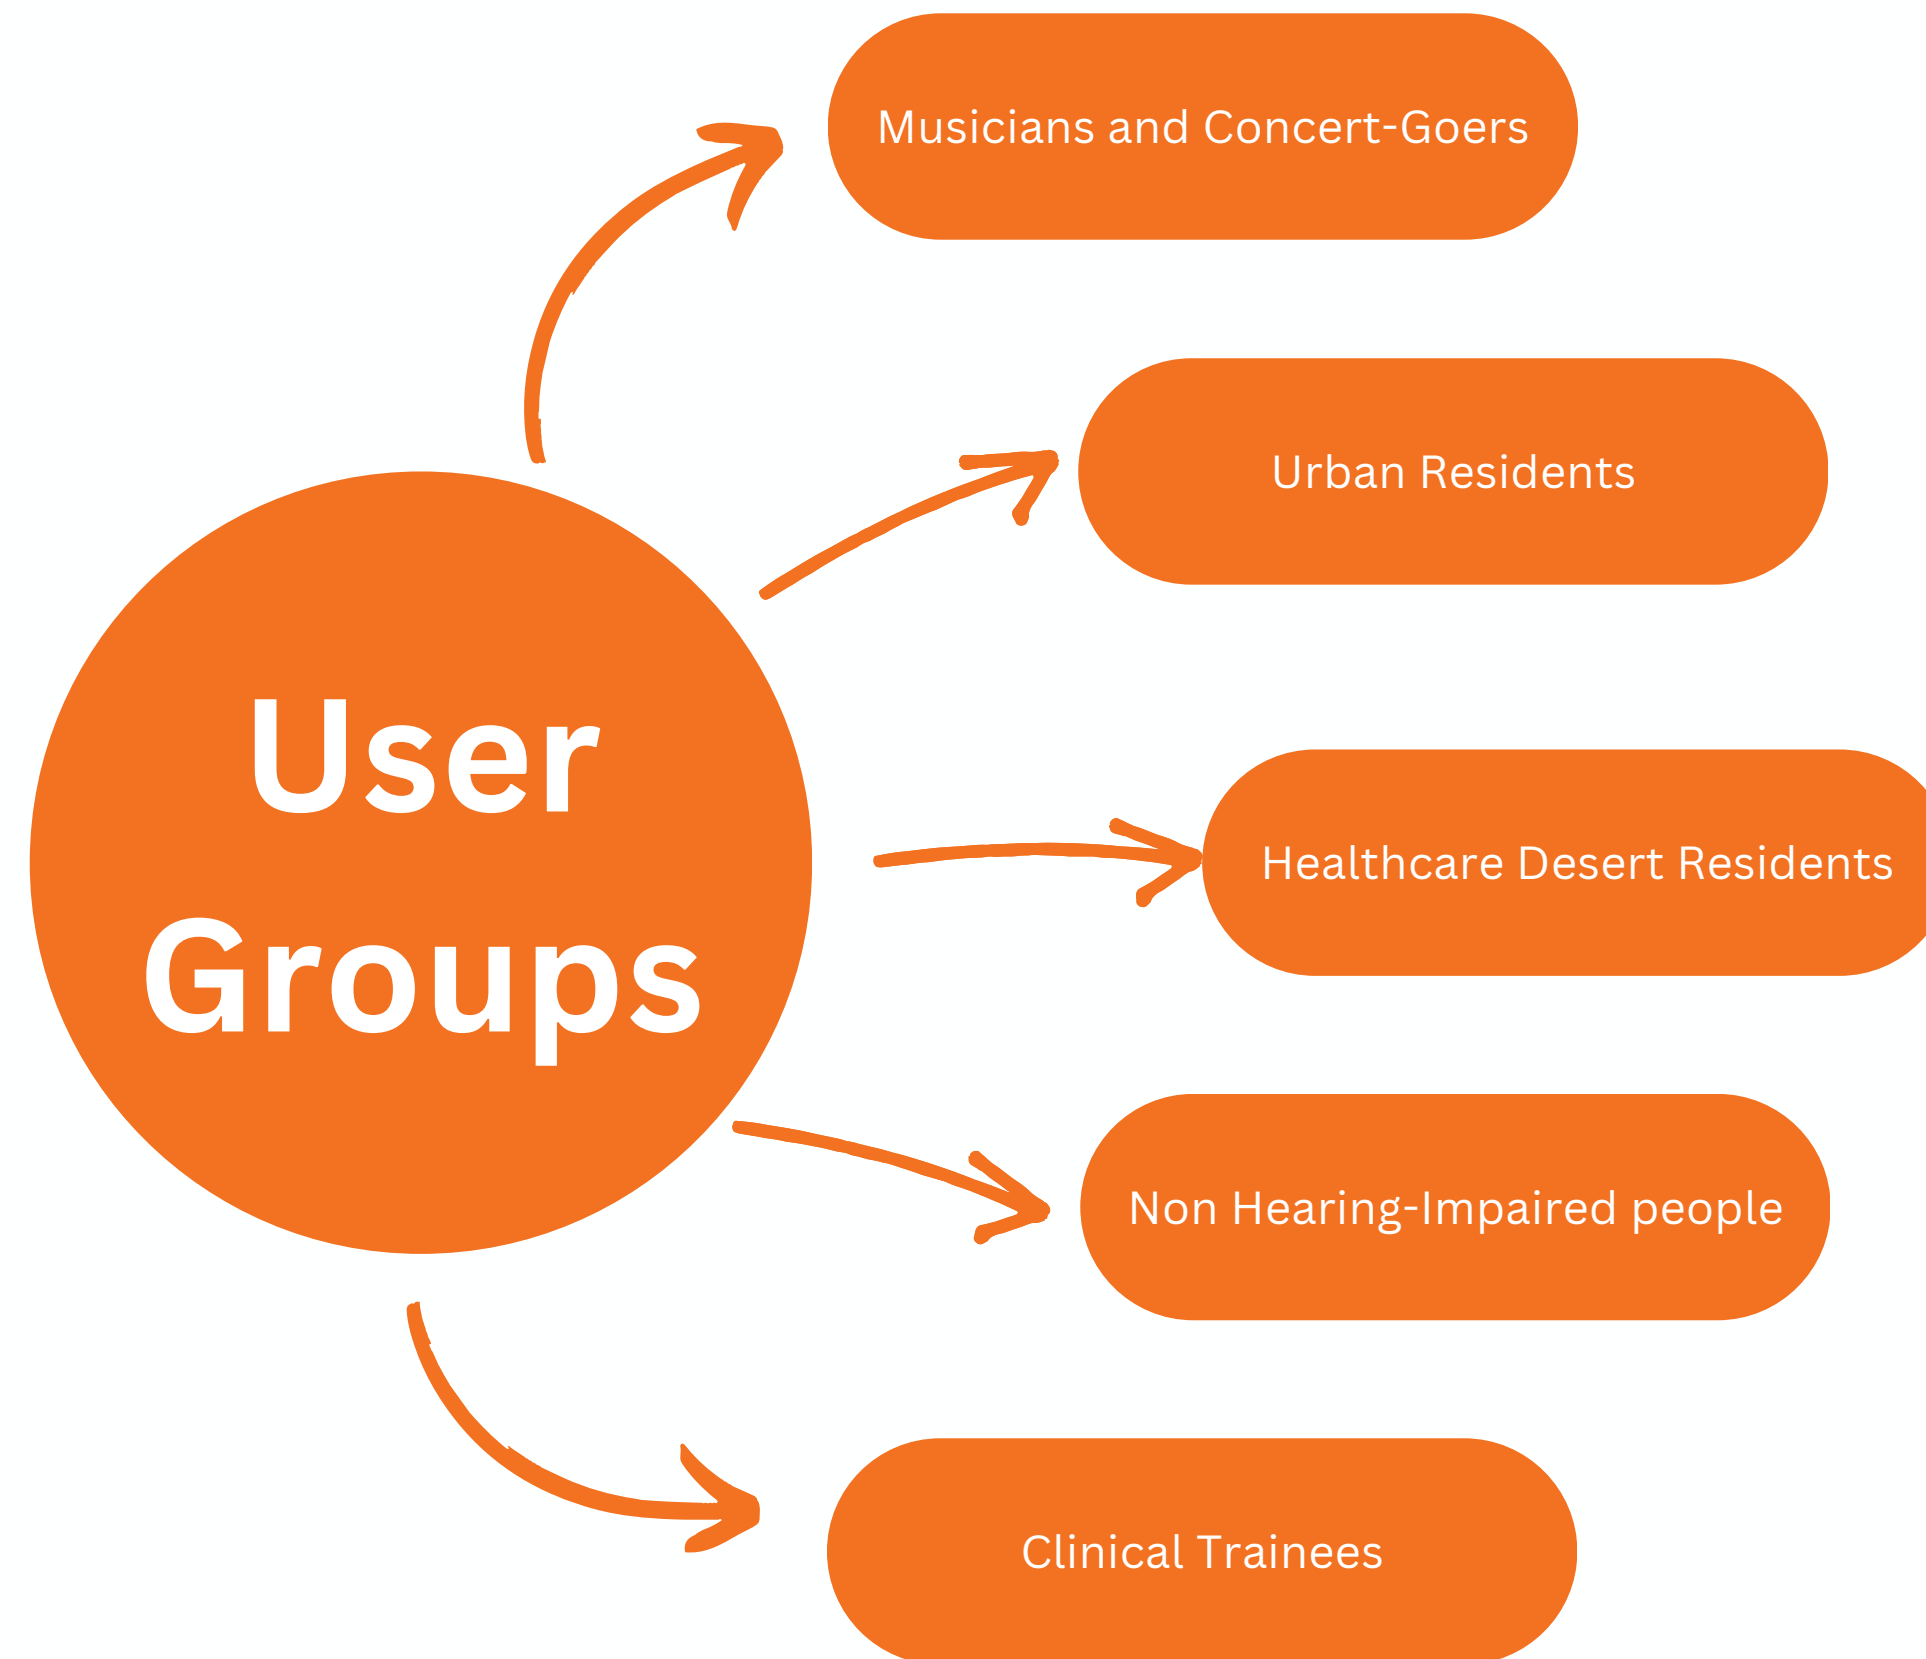

Service

Remove physical restraints of the clinic and offer hearing services in areas that might not have regular access to them.

Target Users

Though our clinic will offer services to anyone who seeks them, we have identified some key users who are essential to fulfilling our mission

What Sets Us Apart?

- Easily accessible, enjoyable process
- Preventative, as opposed to acute care
- Mobile clinic that comes to you
- Robust online presence
- Simple and easy to engage

Central Austin, get your hearing checkup!

- Hearing Check-up
- Service of Hearing Aids
- Speech/Language Screenings
- Referral to Specialists
- Expert-approved products

Scaling

We plan to test this clinic in Austin, and then expand to other regions to serve more populations in the following ways.

- 01** Increasing number of cities serviced
- 02** Collaborations with local musicians
- 03** Growing returning customer base

Three Horizons

H1: Providing sustainable hearing healthcare
H2: mobile infrastructure, preventative care
H3: "aestheticize" hearing care

Revenue Streams

Our clinic will establish revenue in several different ways in order to sustain operations in the long-term.

Sale of hearing protection and assistance devices (60%)

Includes ear plugs, molds, hearing aids, and auxiliary assistance tech

For other ear and hearing-related practitioners (neurotologists, balance specialists, etc.)

Sponsorships of referring providers/hearing care physicians (20%)

Donations (20%)

Fundraising efforts

Social Impact

What do we anticipate as the ultimate goal of this clinic?

01

Building Trust around preventative care in underserved communities

02

Increasing Awareness for hearing health as a necessary check-up service, rather than an emergent one

03

Servicing Diverse Communities by visiting regions with varied socioeconomic status and demographic patterns

Key Performance Indicators

Measuring the success of our clinic in encouraging preventative hearing health and educational programming

INCLUSION

Number of communities co-designed with

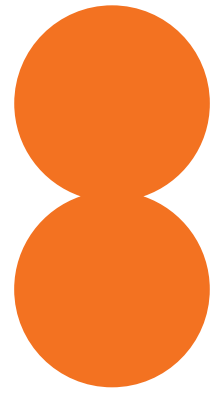

SCALE

Growth in cities serviced and number of clinics

RELIABILITY

Expressed confidence in program from patients

THANK YOU!
